

Ameen Alam

MERN Stack Developer

As a passionate MERN stack developer, I bring proficiency in MongoDB, Express.js, React, and Node.js to the table. My expertise extends to crafting seamless user interfaces that effortlessly translate design concepts into reality. Committed to continuous learning, I strive for innovation, aiming to build robust and scalable web applications that push the boundaries of modern development.

PERSONAL PROJECTS

Keeper App (01/2024)

- Keeper App is a dynamic note-taking application developed using React. It offers a range of functionalities such as creating, editing, and organizing notes, as well as setting reminders and categorizing content.
- With its user-friendly interface and streamlined operations, Keeper App revolutionizes the way users manage their notes, making the process efficient and enjoyable.

Tindog Startup Website (09/2023)

- Meticulously crafted using HTML, CSS, and the Bootstrap framework, the Tindog Startup Website is a revolutionary platform dedicated to helping your furry friends find their true love.

Personal Portfolio Website (06/2023)

- Designed using HTML, CSS, and JavaScript, my Portfolio Website serves as a dynamic platform to showcase my skills, projects, and experiences, connecting me with opportunities and like-minded individuals in the professional world.

Library Management System (12/2023)

- Developed in C++, the Library Management System efficiently manages library resources and operations.
- It offers functionalities like adding, removing, and updating books, as well as managing borrower records and tracking book transactions.
- The system enhances library management processes with its user-friendly interface and streamlined operations.
